

Peace Of Mind For Parents In Phone Free Schools

Phone free schools can bring **real benefits for focus, wellbeing, and learning**. But for many parents, one concern remains: if my child needs to contact me during the school day, how will they do it?

My home Call keeps you connected

It is a secure communication platform designed to support phone free schools by allowing children to contact their parent, guardian, or other trusted adult from a borrowed smartphone, tablet, or school kiosk when they need to share something important.

Built for Phone Free Schools

My Home Call is designed to work alongside school phone policies, not against them.

It gives schools a secure and controlled way to support students who may need to contact home during the school day in situations such as:

- ✓ Being late or delayed
- ✓ Forgetting PE kit, lunch, or another important item
- ✓ Feeling unwell
- ✓ Changes to collection arrangements
- ✓ Missing transport
- ✓ Feeling upset or needing reassurance

Rather than relying on unrestricted phone access, My Home Call provides a purpose built route for important school day communication.

How It Works

The parent or guardian sets up the account

A parent or guardian creates the child's secure profile and manages their trusted contacts via the My Home Call app.

The child identifies themselves when needed

If they need to make contact during the school day, they use a borrowed device or school kiosk, go to the My Home Call website, enter their name, and complete a quick and secure facial scan.

Secure contact is made

Once identified, they can send a pre-written message or make a short call to a saved contact, without exposing personal phone numbers.

Why Parents Value It

Supports phone free learning

Children can benefit from a more focused and less distracting school environment without needing a personal phone on them during the day.

Keeps communication open when it matters

Parents know there is still a secure and practical way for their child to get in touch during the school day.

Simple and accessible

There is no need for the child to remember numbers, carry a phone, or download anything onto the device they are using.

Safeguarding and Security

My Home Call is designed with clear safeguards to make sure it is used appropriately within a school setting.

1

Pre-written messages only

There is no free-text messaging, helping prevent misuse.

2

Time-limited calls

Calls are kept short to support purposeful communication.

3

Encrypted contact routing

Personal contact details are protected and never displayed publicly on the device being used.

An Added Benefit Beyond School

My Home Call supports phone free schools, but it also gives families reassurance beyond the school day. If your child's phone is flat, forgotten, lost or stolen, they can still contact home securely using any available borrowed device. It is a simple extra layer of safety when they need it most.
